

CSc 59929
Introduction to Machine Learning
Assignments for Week 10
Due November 7 by 10:59 AM

- **Compete the programming exercise described in the following charts.**
- **Submit the information about your project as described in the Project Assignment.**

Programming Exercise

- Apply various **Scikit Learn SVM Kernel Classifiers** to the **Iris dataset** and upload your .ipynb file.
- You can use the code we ran in class from the Scikit Learn documentation as your starting point. I have uploaded this code to the course site.
- Go into some detail about the attributes returned by the classifiers.
- Use a number of different kernels and compare the results you get with them.
